Profile

Motivated and detail-oriented professional transitioning into data analytics, with a strong foundation in data analysis, IT systems and business operations.

Currently completing a Diploma in Data Analytics (Mission Ready) and a Level 5 Certificate in Information Technology (Open Polytechnic), expected mid-2026, with hands on experience in SQL, Python, Power BI, and Microsoft Fabric.

Bringing over 20 years of experience across business ownership, operations, and workforce training, with strengths in problem solving, organisation, and stakeholder communication. Seeking to apply analytical skills to deliver meaningful data-driven insights.

Skills

Data & Analytics

- SQL
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Excel (PivotTables, Power Query)
- Data cleaning, ETL, and data visualisation

Business Intelligence & Tools

- Power BI
- Microsoft Fabric
- Jupyter Notebooks

Machine Learning

- Logistic Regression, Random Forest, Gradient Boosting
- Model Evaluation (Accuracy, RMSE, Confusion Matrix)

Other

- Data storytelling & Reporting
- AI tools (ChatGPT, Copilot)
- Basic web development (HTML, CSS, JavaScript)
- Foundational knowledge of databases, cybersecurity, and networking

---

Core Strengths

- Strong problem-solving skills with a growing ability to apply analytical thinking to data related challenges
- High attention to detail and accuracy working with data and reporting
- Effective stakeholder communication and relationship building across diverse environments
- Strong time management and ability to prioritise tasks in high-pressure situations
- Adaptable and proactive learner, continuously building skills in new tools and technologies

---

Education

Diploma in Data Analytics (Part-time, Online)

Mission Ready – Auckland, NZ
Expected completion: June 2026

- Developed skills in data analysis using SQL, Python, Microsoft Fabric, Databricks, and Power BI
- Built and evaluated machine learning models including Logistic Regression, Random Forest and Gradient Boosting
- Applied model evaluation techniques such as accuracy, RMSE, and confusion matrices
- Performed data cleaning, transformation, and ETL processes
- Created dashboards and visualisations to communicate insights
- Applied data analysis to real-world business problems
- Developed report writing and presentation skills

New Zealand Certificate in Information Technology (Level 5)

Open Polytechnic – New Zealand
Expected completion: July 2026

- Developed foundational knowledge of IT systems, including cybersecurity, networking, databases, and web development
- Applied troubleshooting and technical support principles to diagnose and resolve common IT issues
- Gained practical understanding of data management, including data storage, retrieval, and basic database concepts.
- Explored user experience (UX) principles to improve usability and end-user interaction
- Built report writing, communication, and teamwork skills through collaborative and technical assignments

---

Projects

Loan Approval Prediction (Machine Learning Project) – Mission Ready

- Built and evaluated predictive models including Logistic Regression, Random Forest and Gradient Boosting
- Achieved 93% accuracy using Gradient Boosting
- Identified key drivers of loan default risk, supporting improved decision making.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA)
- Tools: Python, Pandas, Scikit-learn, Seaborn

Experience

Business Owner / Professional Nail Technician

The Beauty Studio - *Apr 2014 – Feb 2025*

- Built and maintained strong client relationships, achieving high client retention and repeat bookings
- Managed all business operations including scheduling, finances, and inventory for a client base of 50+ regular customers
- Maintained high standards of service quality, hygiene, and presentation
- Adapted services to meet client needs, driving repeat business and referrals
- Kept up to date with industry trends through ongoing professional development

---

Machine Operator / Trainer Assessor / Pit Controller

Rio Tinto - *Aug 2005 – Sep 2011*

- Operated heavy machinery safely and efficiently to meet production targets
- Delivered training to new operators, ensuring safety and compliance
- Monitored and adjusted equipment assignments using digital fleet management systems, analysing real-time operational data
- Maintained training records and supported workforce development, ensuring accurate tracking of employee performance and compliance data
- Coordinated equipment dispatch and responded to operational disruptions
- Promoted strong health and safety practices

Showroom Consultant

Reece Plumbing - *Apr 2002 – May 2005*

- Delivered customer consultations, increasing sales and satisfaction
- Maintained showroom presentation and merchandising standards
- Coordinated with suppliers and contractors to support projects
- Supported team operations during high-demand periods
