Profile

Driven and detail-focused professional with a recently completed Diploma in Data Analytics and hands-on experience delivering reporting and business intelligence solutions within a large operational environment. Through my internship with Kordia's Operational Support Systems (OSS) team, I have developed practical experience in report automation, dashboard development, data analysis, process mapping, stakeholder engagement, and transforming operational data into meaningful insights that support decision-making.

Bringing over 20 years of experience across operational environments, including mining operations, workforce training, and business ownership, I have developed strong skills in planning, coordination, stakeholder communication, problem-solving, and managing competing priorities. Combining analytical capability with real-world operational experience, I am motivated to contribute to roles that support performance improvement, operational delivery, and data-driven decision-making.

Skills

Data & Analytics

- SQL, M, Python (Pandas, NumPy, Matplotlib, Seaborn)
- Excel (PivotTables, Power Query, M Language)
- Data cleaning, ETL, and data visualisation
- API data extraction and integration (REST APIs, JSON)

Business Intelligence & Tools

- Power BI
- Microsoft Fabric
- Jupyter Notebooks
- Jira
- Reporting

Machine Learning

- Logistic Regression, Random Forest, Gradient Boosting
- Model Evaluation (Accuracy, RMSE, Confusion Matrix)

Other

- Data Storytelling & Reporting
 - Stakeholder Engagement & Requirements Gathering
 - Process Mapping & Process Improvement
 - Operational Reporting & Performance Analysis
 - Project Coordination & Planning
 - Data Management
 - Database Concepts & Data Structures
 - Cybersecurity & Networking Fundamentals
 - Working with Large Operational Systems & Complex Processes
 - AI Tools (ChatGPT, Copilot)
-

Core Strengths

- Strong analytical and problem-solving skills, with the ability to identify trends and support data-driven decision-making.
 - Reporting and business intelligence experience, including dashboard development, report automation, and performance analysis.
 - Effective stakeholder communication and relationship building across diverse operational and technical environments.
 - Project coordination and organisational skills, with the ability to manage competing priorities and meet deadlines.
 - High attention to detail and accuracy when working with data, reporting, and documentation.
 - Experience working in fast-paced operational environments where planning, risk awareness, and adaptability are essential.
 - Proactive and adaptable learner, continuously building capability in new technologies, systems, and analytical tools.
-

Education

Diploma in Data Analytics (Online)

Mission Ready – Auckland, NZ

Expected completion: June 2026

- Developed skills in data analysis using SQL, Python, Microsoft Fabric, Databricks, and Power BI
 - Built and evaluated machine learning models including Logistic Regression, Random Forest and Gradient Boosting
 - Applied model evaluation techniques such as accuracy, RMSE, and confusion matrices
 - Performed data cleaning, transformation, and ETL processes
 - Created dashboards and visualisations to communicate insights
 - Applied data analysis to real-world business problems
 - Developed report writing and presentation skills
-

New Zealand Certificate in Information Technology (Level 5)

Open Polytechnic – New Zealand

Expected completion: July 2026

- Developed foundational knowledge of IT systems, including cybersecurity, networking, databases, and web development
 - Applied troubleshooting and technical support principles to diagnose and resolve common IT issues
 - Gained practical understanding of data management, including data storage, retrieval, and basic database concepts.
 - Explored user experience (UX) principles to improve usability and end-user interaction
 - Built report writing, communication, and teamwork skills through collaborative and technical assignments
-

Projects

Loan Approval Prediction (Machine Learning Project) – Mission Ready

- Built and evaluated predictive models including Logistic Regression, Random Forest and Gradient Boosting
 - Achieved 93% accuracy using Gradient Boosting
 - Identified key drivers of loan default risk, supporting improved decision making.
 - Performed data cleaning, feature engineering, and exploratory data analysis (EDA)
 - Tools: Python, Pandas, Scikit-learn, Seaborn
-

Experience

Data Analyst Intern

Kordia | Auckland, NZ | *April 2026 – Present*

- Replaced manual Excel-based reporting with automated Power BI reporting solutions, improving reporting efficiency and accessibility of operational data.
 - Collaborated with stakeholders to gather reporting requirements and deliver dashboards that support operational planning and decision-making.
 - Analysed operational and network performance data to identify trends, risks, and opportunities for improvement.
 - Designed and maintained data models and reporting solutions to support ongoing business and operational reporting.
 - Coordinated data from multiple systems to create a single source of truth for reporting and analysis.
-

Business Owner / Professional Nail Technician

The Beauty Studio - *Apr 2014 – Feb 2025*

- Built and maintained strong client relationships, achieving high client retention and repeat bookings
 - Managed all business operations including scheduling, finances, and inventory for a client base of 50+ regular customers
 - Maintained high standards of service quality, hygiene, and presentation
 - Adapted services to meet client needs, driving repeat business and referrals
 - Kept up to date with industry trends through ongoing professional development
-

Machine Operator / Trainer Assessor / Pit Controller

Rio Tinto - *Aug 2005 – Sep 2011*

- Operated within a large-scale mining operation, contributing to the safe and efficient delivery of production targets in a high-pressure environment.
 - Delivered training and competency assessments for new operators, ensuring compliance with safety procedures and operational standards.
 - Monitored fleet activity using digital dispatch and fleet management systems, analysing real-time operational information to support efficient resource allocation.
 - Maintained accurate training, compliance, and workforce records, supporting reporting requirements and workforce capability planning.
 - Coordinated fleet movements and resource allocation to support operational delivery targets in a fast-paced mining environment.
-

Showroom Consultant

Reece Plumbing - *Apr 2002 – May 2005*

- Delivered customer consultations, increasing sales and satisfaction
 - Maintained showroom presentation and merchandising standards
 - Coordinated with suppliers and contractors to support projects
 - Supported team operations during high-demand periods
-
